

Socio-technical and institutional innovations for conservation and valorization of the Cerrado biome

OBJECTIFS

The general objective of the project is to characterise the socio-technical and institutional innovations for the conservation and valorisation of the Cerrado biome through agro-extractivism activities.

The two sub-objectives are

- To analyse the potential of local family farming systems to valorise agro-extractivism in the Cerrado biome
- To identify and analyse socio-institutional innovations in terms of transformation and enhancement of the socio-biodiversity of the products of the Cerrado biome
