Comparison of three Arecacea genomes: oil palm (Elaeis guineensis), date palm (Phoenix dactylifera) and coconut tree (Cocos nucifera); co-evolution of sorghum and striga, association study in sorhum and pearl millet

## **PERSPECTIVES**

Comparison of three Arecacea genomes: we are currently annotating all the sequences then the comparison will be performed between the tree Arecacea species and with rice.

A publication on these results will be written jointly by the two research teams
