

ECPA 2019

Organisation de la 12ème Conférence européenne sur l'agriculture de précision (ECPA) 2019 à Montpellier

ABSTRACT

The aim of ECPA 2019 is to bring together the entire scientific community working in the field of precision agriculture at a single conference. During this conference, several topics will be discussed in order to take stock of the advances and ongoing work in this field. ECPA 2019 will focus on the application of precision agriculture to small farms in the Mediterranean and in particular in developing countries. To this end, one or two sessions will be specially organised on this theme and a keynote speaker from the CTA (Centre for Agricultural and Rural Development) will present, through concrete projects, how digital tools can be a driving force for small family farms in the South (Benjamin Kwasi Addom, Making Precision Agriculture work for Smallholder Farmers <https://ecpa2019.agrotic.org/keynote-speakers/>)

Year : 2018

Project number : 1800-014

Type of funding : PC

Project type : SP

Research units in the network : LISAH SYSTEM MISTEA

Start date : 2019-01-01

End date : 2019-09-01

Flagship project : no

Project leader : Bruno Tisseyre

Project leader's institution : InstitutAgro

Project leader's RU : ITAP

Budget allocated : 10000 €

Total budget allocated (including co-financing) : 10000 €

Funding : Labex
