

Ad hoc support : Workshop Franco-Taiwanais

Franco-Taiwanese Workshop on Plant Biology Applied to Plant Improvement

ABSTRACT

Organisation of a French-Taiwanese workshop, in Font Romeu, from october 22 to 25 2013. Thirty persons participated to the workshop which included 20 invited communications, 8 from Taiwan and 12 from France. The main goal was to identify existing collaborations and eventually initiate new ones. The following fields were covered: fruit quality and development in tomato, role of phloem in systemic signals transport, response to thermic and hydric stress, to excess and deficiency in metals, control of viral infections, response to phytoplasma pathogens, floral development in rose and orchidaceae as well as comparative genomics

Keywords : Developing the plant of the future

Year : 2013

Project number : 1300-004

Type of funding : SP

Project type : PC

Research units in the network : AGAP BPMP IPME-PHIM

Start date : 2013-03-18

End date : 2013-12-31

Flagship project : no

Project leader : Jean-Marc Deragon Michel Delseny

Project leader's institution : UPVD

Project leader's RU : LGDP

Budget allocated : 8320 €

Total budget allocated (including co-financing) : 8320 €

Funding : Labex

PERSPECTIVES

Intensification of French Taiwanese collaborations
