Initiative for Federating Research and Training in Food Nutrition and Health

ABSTRACT

The general objective is to set up an initiative to structure the scientific community (Montpellier-Avignon) on food and nutrition (including health) in order to share our skills, to give coherence between research-education-development, to increase our visibility, and to produce a detailed strategic document in this field. This initiative is fully integrated into the MUSE triptych: care (health approach to food), feed, protect (environmental impact of food systems). It is also closely linked to the Unesco Chair "Food of the World".

The detailed objectives are

- to establish a map of research and teaching in food-nutrition-health (Montpellier-Avignon) and permanent national and international collaborations (academic and non-academic partnerships);
- to promote meetings within the "food-nutrition-health" scientific community
- to identify 3 major original research areas around which we could federate multidisciplinary projects based on our complementary skills.

Keywords : 1. Exclu de la photothèque

Year : 2018

Project number : 1800-018

Type of funding : SP

Project type : PC

Research units in the network : QUALISUD NUTRIPASS IATE

Start date : 2019-01-01

End date : 2019-06-30

Flagship project : no

Project leader : Marie-Joseph Amiot-Carlin

Project leader's institution : INRA-INRAE

Project leader's RU : MOISA

Budget allocated : 8000 €

Total budget allocated (including co-financing) : 8000 €

Funding : Labex
