

MAACP

Ouvrage QUAE. Architecture et croissance des plantes. Modélisation et applications

ABSTRACT

Support for the finalisation and publication of the electronic and paper books entitled "Architecture and growth of plants. Modelling and applications".

The electronic support, in French (compatible with e-readers, tablets, smart phones...), consists of all the original contributions representing a volume equivalent to 1000 pages, abundantly illustrated (700 scientific figures).

The paper book, in French, is more synthetic and is aimed at a wider audience, comprising about 500 pages with a hundred pages of high-resolution figures.

These two materials expand on the English-language online courses, in WEB form, which are more concise and intended for online teaching, comprising 250 pages, exercises and case studies. This third support is not concerned by the request, as it is already finalised and operational:

Year : 2016

Project number : 1600-027

Type of funding : PC

Project type : SP

Research units in the network : BIOAGRESSEURS-PHIM

Start date : 2016-12-01

End date : 2017-09-30

Flagship project : no

Project leader : Marc Jaeger

Project leader's institution : CIRAD

Project leader's RU : AMAP

Budget allocated : 4000 €

Total budget allocated (including co-financing) : 4000 €

Funding : Labex
