

SOCIOBIOCERRADO

Socio-technical and institutional innovations for conservation and valorization of the Cerrado biome

ABSTRACT

This project is a continuation of a multidisciplinary research initiative on the development of family farming products in the Cerrado biome. As part of this initiative, the Innova-Cerrado international seminar was held at the University of Brasilia in December 2013 to present several research papers on institutional innovations to promote family farming practices associated with the sustainable use of biodiversity in this biome. Year : 2014

Project number : 1402-015

Type of funding : AAP CAPES-EMBRAPA

Project type : AAP

Research units in the network : INNOVATION

Start date : 2015-01-01

End date : 2016-12-31

Flagship project : no

Project leader : Stephane Gueneau

Project leader's institution : CIRAD

Project leader's RU : MOISA

Budget allocated : 59800 €

Total budget allocated (including co-financing) : 80000 €

Funding : Labex

GOAL

The general objective of the project is to characterise the socio-technical and institutional innovations for the conservation and valorisation of the Cerrado biome through agro-extractivism activities.

The two sub-objectives are

- To analyse the potential of local family farming systems to valorise agro-extractivism in the Cerrado biome
- To identify and analyse socio-institutional innovations in terms of transformation and enhancement of the socio-biodiversity of the products of the Cerrado biome
