For the land and the people, legumes at the heart of innovation. 2nd French-speaking meetings on legumes

ABSTRACT

The aim is to continue exchanges between scientists and operators in the sector on the place of pulses, both seed and fodder, in agricultural systems and sectors, for their use in food and feed, or non-food uses.

At a time when international strategies are being developed for pulses (particularly in Canada, China, India and Eastern Europe), when strong actions are being launched in France (at national, regional and territorial levels) with numerous large-scale projects (such as the PEAMUST future investment programme, the ANR LEGITIMES, the new European programmes H2020 LEGVALUE, EUCLEG and REMIX...), these exchanges will promote the construction of a common vision on the challenges of legume development between France and the other French-speaking countries, particularly the countries of North and Sub-Saharan Africa, and to strengthen the dynamics of innovation on these species through access to new knowledge and exchanges with operators in the sector. These 2nd meetings should mobilise 300 to 350 researchers and operators in the sector.

Year : 2017

Project number : 1700-012

Type of funding : SP

Project type : PC

Research units in the network : ECO&SOLS IATE MOISA QUALISUD ABSYS

Start date : 1970-01-01

End date : 2018-12-31

Flagship project : no

Project leader : Yves Prin

Project leader's institution : CIRAD

Project leader's RU : LSTM

Budget allocated : 10000 €

Total budget allocated (including co-financing) : 10000 €

Funding : Labex
