

African roads to sustainable agroecology summer school – hot topics and targeted solutions

OBJECTIFS

Our goal is that AfriSASS participants (students, practitioners, lecturers):

- Enhance their knowledge of opportunities and challenges in agroecology within sub-Saharan Africa, particularly with respect to transformative change, and
 - Can apply a transdisciplinary approach to societal problem solving, particularly in the context of agriculture
- Specific objectives:
- Transfer knowledge with respect to the FAO's 10 principles of agroecology, and their interactions
 - Teach the transdisciplinary learning approach to societal problem solving
 - Enhance participants' cognitive (knowledge), affective (attitudes), and psychomotor (skills) domains
 - Evaluate the quality of the school with participants and lecturers.
 - Define options for continuation of the school in future years.
